

ORDER/NERC/278/2021

**BEFORE THE NIGERIAN ELECTRICITY REGULATORY COMMISSION  
IN THE MATTER OF THE EXTRAORDINARY REVIEW OF MULTI-YEAR TARIFF ORDER FOR  
PORT HARCOURT ELECTRICITY DISTRIBUTION PLC**

**1.1. Title**

This regulatory instrument may be cited as NERC Order on Performance Improvement Plan (PIP) and Extraordinary Tariff Review Application for Port Harcourt Electricity Distribution Plc ("PHED").

**1.2. Commencement**

The approved PIP and Capital Expenditure ("CAPEX") programme of PHED shall take effect from 1<sup>st</sup> July 2021 and shall remain effective until 30<sup>th</sup> June 2026 unless amended by the Commission.

**1.3. Context**

PHED applied to the Commission in November 2019 for a review of the provisions for CAPEX in its Multi-Year Tariff Order ("MYTO") tariffs to support the implementation of its Performance Improvement Plan ("PIP") over the next 5 years. Under the Power Sector Recovery Program (PSRP), it is envisaged that the Commission would implement a robust tariff review process aimed at improving the performance of the Nigerian Electricity Supply Industry ("NESI"). This process involved a review of the capital expenditure allowances in the MYTO model to align with the Performance Improvement Plans (PIPs) of the Distribution Companies (DisCos). The approved PIP and Extraordinary Tariff Application shall form the basis for PHED to prioritise the implementation of the proposed CAPEX initiatives. The approved PIPs shall also form the basis for defining KPIs for PHED for the next 5 years by the Commission with emphasis on improvement in energy throughput and improved service delivery to the customers.

As part of the Stakeholder Consultation Process for Extra Ordinary Tariff Review, the Commission held public hearings to consider the applications filed by PHED in January 2020 and monitored the stakeholders' engagements by PHED at different locations within

its franchise. Based on the feedback received during the consultations and subsequent deliberations with various stakeholders, the Commission approved the Service-Based Tariff (SBT) effective from the 1st of September 2020 to ensure that rates paid by customers align with the quality of service as measured by the daily average availability of power supply over a 60-day reference period. Further updates to PHED's initial PIP submission have been considered as part of this review to align the PIPs with customer expectations of service commitment by PHED.

#### 1.4. Summary and Overview of PHED's Network/Current State

PHED provides power for approximately 18.9 million people in 4 states of Nigeria covering Rivers, Bayelsa, Cross River, and Akwa Ibom. The service area of PHED is spread across 49,087Sq.km covering more than half a million customers with an average annual supply of about 2,000 MUs served through 118 Injection Substations, 74 No. 33kV feeders, 233 No. 11kV feeders, and 13,155 distribution transformers with a total installed capacity of 3,081MVA.

PHED licensed area is fed from fourteen (14) 132kV transmission lines with a cumulative capacity of around 1680MW, thirteen (13) 132/33kV Transmission stations having 28 power transformers with a total installed capacity of 1,442MVA. Distribution is carried out through 74 feeders of 33 kV and 233 feeders of 11kV, connected with 118Nos injection substations with an installed capacity of 1,542.4MVA.

Based on the demand forecast and network constraints analysis, PHED made a diagnostic of the current state of the network with the following results.

- The mismatch of infrastructure and its capacity between TCN and PHED resulting in demand-side management and curtailing of loads to prevent tripping/failures on the network and substation.
- Absence or improper positioning of TCN facilities vis-a-viz PHED's load center compels PHED to build lengthy networks affecting voltage drop and quality of supply.
- The absence of automation and power management systems poses operational challenges given the vastness of the network.
- Susceptibility of bare/open conductors (power lines) to breakdowns, accidents, energy theft, and technical losses.
- Lack of Smart Metering and AMI/AMR infrastructure
- Lack of meters (customer, feeder, and DT metering)
- Lengthy network, ageing undersized conductors and cables, overloaded power and distribution transformers, poor network design
- Ageing /obsolete injection substation facilities

   2

### 1.5. Stakeholder Consultation

PHED had followed a process for stakeholder consultation as directed by the Commission. Several focused group discussions to harness stakeholder's views on the service delivery, future expectations, and preferences were conducted with various customer groups. For instance, feeder-wise and State-wise community engagements were held with different customer groups segmented based on revenue, consumption, and type (NGO, cooperative society, women groups, traditional rulers government agencies). These engagements were required to:

- instill accountability between PHED and its customers on the services and justification for associated costs and resulting tariffs;
- assist in minimising disputes by engendering understanding and trust between PHED and its customers;
- provide an opportunity for PHED to engage with customers on the service improvement initiatives proposed in the PIP.

Key discussion areas for the stakeholder sessions were:

- Quality and reliability of supply
- Quality of the metering, billing, and payment process
- Consumers' perception of the processes
- Consumer relationship management and energy efficiency schemes
- Quality of fault complaint and repairs process

### 1.6. Outputs proposed with interventions:

PHED proposes to undertake numerous interventions to improve service delivery to the customers. Over the next five years, the proposed interventions will allow PHED to achieve but not limited to the following:

- Reduce ATC&C losses from the current level of 52.82% to 25.18% over 5 years
- Achieve 100% metering of customers by installing 369,171 meters over 3years
- Improve customer safety and reduce inadvertent accidents
- Increase number of new customers from the current level of 758,757 to 1,082,413 over 5 years

Table – 1: Planned Service Improvements

Item	Unit	Current	Service Improvement	Year-5 Target	Variance
Customers	#	758,757	323,656	1,082,413	42.66%
ATC&C Loss	%	53	-28	25.2	-52.33%
Energy Delivered	GWh	1,984	1,894	3,877.6	95.44%
Average Duration of Supply	(Hrs/Day)	7	6	13	79.24%
Average Frequency of Interruptions	#/day	3.79	-2	1.9	-49.56%
Average Duration of Interruptions	Hrs/day	17	-14	3	-82.03%

### 1.7. Investment Strategies:

Key strategies proposed by PHED to attain the targeted service levels over the next 5 years include the following:

1. Implementation of investments and other initiatives in distribution network rehabilitation and upgrade aimed at resolving existing constraints limiting availability and quality of energy supply.
2. Identification of eventual constraints to meeting electricity demand arising from issues affecting high and medium voltage network infrastructure.
3. TCN-DisCo interface projects are required in resolving existing constraints and meeting electricity demand.
4. Installation of metering systems to capture all electrical parameters involved in commercial transactions with NBET and TCN and amounts of energy injected into the network operated by the DisCo.
5. Incorporation of an Incidents Recording and Management System (IRMS) to identify the location and analyze the extent of an interruption in electricity supply and to enable fast resolution and service restoration.
6. Regularization of consumers not registered as customers.
7. Installation of appropriate meters for all the ministries, departments, and agencies at federal, state, and local levels.
8. Incorporation of a Commercial Management System (CMS) to manage all commercial processes: revenue cycle, attending to customers, etc.
9. Incorporation of an Enterprise Resource Planning (ERP) information system to support corporate planning and management of shared services (accounting, finance, human resources, procurement, logistics & information technology).

  
 4

10. Implementation of a Revenue Protection Project (RPP) supported by Advanced Metering Infrastructure (AMI) to systematically record and monitor consumption of large and medium customers.
11. Incorporation of a Supervisory Control and Data Acquisition System (SCADA) to operate and control HV & MV infrastructure.

Table – 2: Proposed Investment (Technical)

Item	Unit	Current	Additions/ Construction	Year-5 Target	Variance	PIP Rehabili tation	% of Rehabili tation
Network Length 33 kV	km	7,615	99	7,714	1%	328	4%
Network Length 11 kV	km	2,292	223	2,515	10%	321	14%
Network Length 0.4 kV	km	14,500	6,259	20,759	43%

## 2.0 Commission's Review

2.1. The Commission's Guideline for PIP Application established criteria for PHED to prepare an output-based plan that sets out the service improvement output targets over the planning horizon of 5 years. This plan includes the programs and activities that will lead to the realisation of those outputs, the human and material resources required, the projected costs and analysis of the risk factors, and the proposed mitigation measures. PHED's PIP and Extraordinary tariff review application was exposed to a Public Hearing and consultation presided over by a panel of three commissioners in line with the Business Rules and the "Regulations on Procedure for Electricity Tariff Reviews in the Nigerian Electricity Supply Industry" in February 2020. The Hearing provided an avenue for customers, interested parties, and expert intervenors to critically examine PHED's proposal and the associated expected improvement in service levels. PHED was further directed to conduct stakeholders' (customers') engagements at various locations within its franchise area which were attended to and monitored by the staff of the Commission.

2.2. Following the outcome of the public consultation, the Commission via Order NERC/198/2020 required PHED to update its PIP and Extraordinary Tariff Review Application by disaggregating its respective service areas and/or customers per quality of service in order to align rates payable by customers with the quality of supply ("service-based tariffs"). A further review of PHED's updated submission was considered using the following criteria:

- i. completeness and consistency of the description of each component of the PIP;
- ii. compliance of each component with the Guidelines for preparation of PIPs issued by the Commission;
- iii. analysis of expected results/outcomes from the implementation of each component including the mitigants provided for addressing identified challenges that may hinder the achievement of target;
- iv. thorough price benchmarking and other relevant approaches to the estimation of resources (physical amounts and related OpEx and CapEx) for each component;
- v. determining if the cost and timeline for delivering the output is efficient;
- vi. assessing the efficiency of the proposed financing arrangement;
- vii. analysing the level of technology/modernization leap proposed going forward;
- viii. determining and analysing the overall level of efficiency improvement proposed.

## 3.0 Results of the Review

The Commission, having considered PHED's PIP and Extraordinary Tariff Review Application in line with the provision of EPSRA and relevant regulations, approved the PIP and CAPEX programme over 5 years as provided in Table – 4 and Table – 5 below.

6  

Summary of approved projects for Year-1 and Year-2 are also provided in Table – 6, while a detailed list of approved projects for Year-1 and Year-2 are provided in Appendices 1 and 2 respectively.

Table – 4: PHED’s Approved 5-year CAPEX Programme

Year	2021	2022	2023	2024	2025	Total
	Period - 1	Period - 2	Period - 3	Period - 4	Period - 5	Period 1 – 5
	₹000,000	₹000,000	₹000,000	₹000,000	₹000,000	₹000,000

#### 4.0 Annual Update of PIPs

PHED shall be required to provide an annual update to the PIP to reflect the proposed investment programme as part of the Minor Review of Tariffs on a continuous basis. The Commission recognizes this PIP as a dynamic roadmap of where PHED envisions to be in the next five (5) years and will continue to evolve in alignment with market development and changes to the operating environment. PHED may invest more than the indicated annual CAPEX figure in any particular year on account of front-loading proposed future investments or due to the unanticipated critical investment needs subject to the approval of the Commission.

#### 5.0 Front-loading of CAPEX

PHED is at liberty to front-load its CAPEX programmes to attain accelerated service improvements. Front-loading of CAPEX programme in any year shall not exceed annual CAPEX for the following year in line with the framework for continuous update of the PIPs.

#### 6.0 CAPEX Clawback

Annual CAPEX provisions that are unutilized or imprudently expended shall be clawed back during Minor Reviews of Tariffs in line with the requirements of Section 7(a) of Regulations on Procedure for Electricity Tariff Reviews in the NESI.

#### 7.0 Commencement and Effectiveness

The approved PIP and CAPEX programme of PHED shall take effect on the 1st day of July 2021 and shall remain effective until the 30th' day of June 2026.

#### 8.0 Signature

Dated this 29<sup>th</sup> day of April 2021

Appendix 1 - Details of Planned 2021 Investments for Port Harcourt Electricity Distribution Company

<i>Distribution Network: lines</i>						
<i>Project Type: Construction of 33kV Feeder</i>						
S N	Project Description	Location	Route Length (km)	Project Completion Date (MM - YY)	Expected Impact in MW)	
1	Airport Line From Rumuosi	Rumuosi TS	15	Nov-21	18	
2	New line from PHRC	PHRC	75	Oct-21	18	
3	Construction of 33kV double circuit structure to 6.5km of Double circuit Amika// crutech 33kV line from Calabar TS to enable a new 33kV line to be extended to Arito Pharmacy to meet the existing 33kV line to Crutech 2 x 7.5mva, 33/11kV injection substation (this project have been awarded already)	Port Harcourt	6.5	Apr-21	18	
4	Construction of a of a dedicated 33kV feeder of about 6km to be known and called Dangote 33kV feeder.	Calabar	6	Dec-21	18	
5	(A). Construction of 6km of Dual circuit 33kV feeders from Calabar Mains TX to Idundu round about. (Idundu/Oban, and Akpabuyo/bakassi 33kV feeders)	Calabar	6	Nov-21	18	
6	Extension of Waterboard 33kV by Dualizing it with existing Streetlight 11kV to supply Proposed Federal Government College 1x15MVA	Calabar	1	May-21	18	
7	Construction Of 0.3km Akankpa/creek town DC from Adlabar to remove them from Calabar TS	Calabar	0.3	May-21	18	
8	Construction of 4km Overhead Line Single Circuit from NTA Road to power proposed Uyo Stadium 15MVA, 33/11kV Injection Substation including the supply and installation of Prepaid Meter in Uyo (tel 3)	Uyo	4	Aug-21	18	

9	Emergency construction interface for new feeder at TCN Ahooda and construction of 4.5KM of double circuit 33kV line from TCN Ahooda to Elele Alimiri including supply and installation of prepaid meter	Ahooda	4.5	Jun-21	18
10	emergency construction interface for new feeder at TCN Ahooda and construction of 5.5KM of double circuit 33kV line from TCN Ahooda to Elele Alimiri including supply and installation of prepaid meter	Ahooda	5.5	Jul-21	18
11	Emergency Construction of 1.4.6KM 33kV Overhead line single circuit to link Isioke-Omogwa (7km) and from Airport round about to Igwuruta roundabout (7.6km) to deload overhead Airport 33kV feeder 1 including supply and installation of prepaid meter at Isioke, Ubima and joining communities	Omogwa	7	Jul-21	18
12	Emergency (1) Construction of 7.5km 33kV overhead lines single circuit from Omogwa/Airport roundabout to Aluu road via airport link road to power proposed Aluu 15MVA, 33/11kV injection substation off airport link road to pick existing Aluu 11kV feeder (3) rehabilitation of Omerelu and Aponi communities 33kV township distribution network	Omogwa	7.5	Aug-21	18
