SUMMIT ON: ACCELERATED SCALE-UP OF RENEWABLE AND DISTRIBUTED ENERGY RESOURCES IN NIGERIA

 22-23 July, 2024 | 9am Daily

 Abuja Continental Hotel, Wuse Zone 4, Abuja.

National Anthem

Nigeria, we hail thee,
Our own dear native land,
Though tribe and tongue may differ
In brotherhood, we stand,
Nigerians all, and proud to serve
Our sovereign Motherland.

Our flag shall be a symbol
That truth and justice reign,
In peace or battle honour'd,
And this we count as gain,
To hand on to our children
A banner without stain.

O God of all creation,
Grant this our one request,
Help us to build a nation
Where no man is oppressed,
And so with peace and plenty
Nigeria may be blessed.

National Pledge

I pledge to Nigeria my Country,
to be faithful, loyal and honest,
to serve Nigeria with all my strength,
to defend her unity, and
uphold her honour and glory,
So help me God.

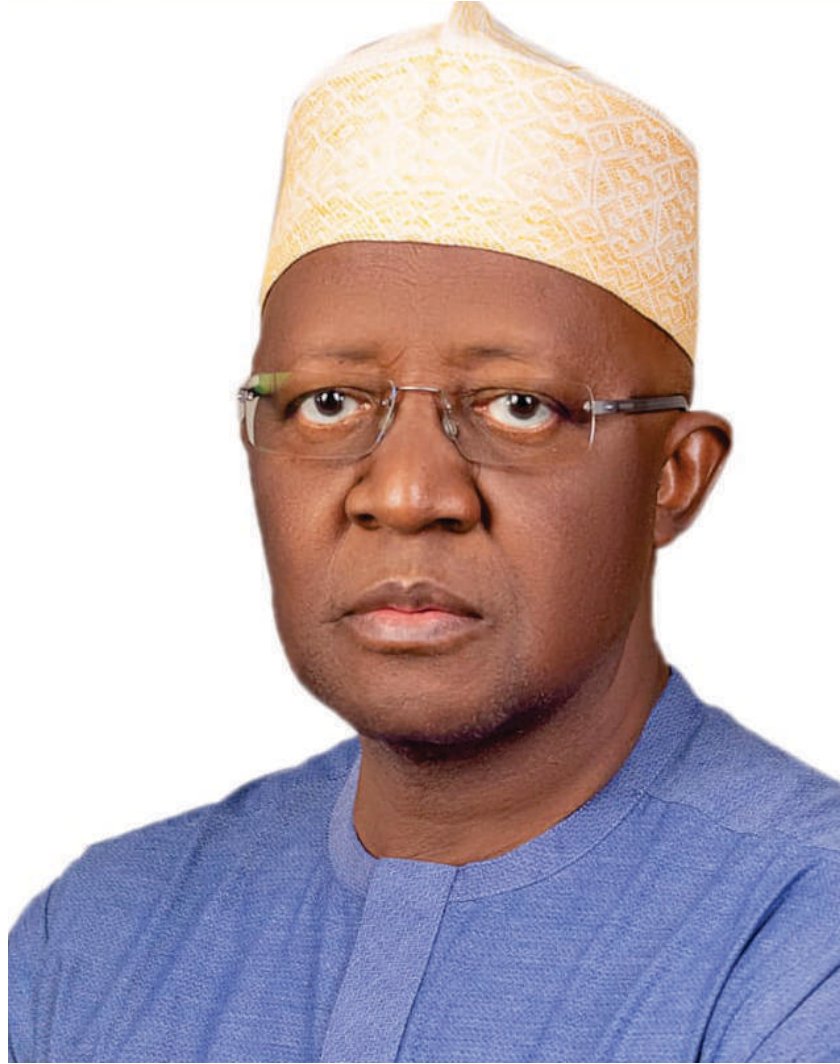

HIS EXCELLENCY

BOLA AHMED TINUBU, GCFR
PRESIDENT, COMMANDER-IN-CHIEF OF THE ARMED FORCES
FEDERAL REPUBLIC OF NIGERIA.

CHIEF ADEBAYO A. ADELABU, OFR, FCA, FCIB
HONOURABLE MINISTER
FEDERAL MINISTRY OF POWER

Engr. SANUSI GARBA

CHAIRMAN / CEO

NIGERIAN ELECTRICITY REGULATORY COMMISSION

OVERVIEW

Over the years, power sector reforms have been targeted at improving energy access in the country through the sustained growth of the sector. However, the Nigerian Electricity Supply Industry (NESI) continues to struggle with significant challenges that prevent it from meeting demand effectively. With an installed capacity exceeding 13,000 MW, the grid often delivers less than 4,000 MW, resulting in a significant supply gap. There is a need to integrate innovative solutions to solve the recurrent challenges such as, outages, limited coverage, and high transmission losses which hinders electricity generation and distribution.

Distributed Energy Resources (DERs), which involves decentralizing energy production and generating electricity close to the point of use, offers a promising solution to these challenges. This approach not only enhances energy security and grid stability but also supports the integration of renewable energy sources. Additionally, it aligns with Nigeria's regulatory targets for embedded generation and renewable energy, as well as the presidential priorities for advancing renewable energy.

This summit seeks to create a platform where critical stakeholders including DisCos, Developers, Investors, Regulators and Government agencies can collaborate, share insights, and forge partnerships to drive the integration of DERs especially from Renewable Energy (RE) sources in the Nigerian Electricity Supply Industry (“NESI”).
