

ORDER NO: NERC/2024/096

BEFORE THE NIGERIAN ELECTRICITY REGULATORY COMMISSION ORDER ON PERFORMANCE MONITORING FRAMEWORK FOR YOLA ELECTRICITY DISTRIBUTION PLC

TITLE

 This regulatory instrument may be cited as the ORDER ON PERFORMANCE MONITORING FRAMEWORK FOR YOLA ELECTRICITY DISTRIBUTION PLC ("YEDC") 2024.

COMMENCEMENT

 This Order shall take effect from 08 July 2024 and shall remain in effect until it is amended or revoked by the Nigerian Electricity Regulatory Commission ("NERC" or the "Commission").

BACKGROUND

- 3. On 20 December 2021, the Bureau of Public Enterprise ("BPE") vide the letter Ref. No. BPE/PTMD/NERC/20/12/M.1, notified the Commission of the expiration of the term of the Performance Agreement ("PA") executed between BPE and the Distribution Companies ("DisCos") on 31 December 2021. Consequentially, the Commission was required to assume the sole responsibility for setting and monitoring DisCos' performance targets with effect from 01 January 2022.
- 4. Section 34(1)(a) of the Electricity Act ("EA") provides that one of the principal objects of the Commission is to *"create, promote and preserve efficient industry and market structures and to ensure optimal utilisation of resources for the provision of electricity service"*.
- Based on the above, on 01 October 2022, the Commission issued the Order No. NERC/326/2022 on Performance Monitoring Framework for Yola Electricity Distribution Company plc ("YEDC" or "the Utility") providing seven

(7) Key Performance Indicators ("KPIs") for assessing the performance of the top management of YEDC over the period of 01 October 2022 to 30 September 2023.

- 6. It is noteworthy that Order No. NERC/326/2022 provided a performance monitoring framework for critical operational activities to ensure that YEDC improved its operational efficiency and guaranteeing its long-term financial sustainability and the following primary objectives:
 - a. Ensure that YEDC maintains market discipline and operate in compliance with the industry targets.
 - b. Ensure improved reliability and quality of supply in accordance with YEDC's commitment in the Performance Improvement Plan ("PIP").
 - c. Lay the foundation for long term sustainability of YEDC.
 - d. Hold the Board and management of YEDC accountable for meeting operational targets specified herein.
- 7. During the effective period of Order No. NERC/326/2022, the Commission undertook periodic evaluation of the performance of YEDC vis-à-vis the set targets and regulatory interventions were taken in line with the provisions of the Order and extant rules of the Commission. A detailed performance report further was shared with the Board of YEDC who remain responsible/accountable for managerial performance and setting the overall strategic direction and targets for YEDC.
- 8. The Commission notes that YEDC's inability to fully comply with all the KPIs contained in the Order No. NERC/326/2022 has led to the failure of YEDC to meet its operational obligations, widespread customer dissatisfaction, undermined its ability to uphold market discipline and imperiled the long-term financial sustainability of the utility.
- 9. Upon the expiration of the Order No. NERC/326/2022, and to reflect the latest developments in the expected evolution of the Nigeria Electricity Supply Industry ("NESI"), it has become imperative for the Commission to develop an updated performance monitoring framework along with a revised list of KPIs against which the management of YEDC shall be measured. With the objective of driving operational and financial excellence, the revised KPIs are also focused on YEDC's compliance with key regulatory actions of the Commission.

OBJECTIVES

- 10. This Order seeks to
 - a. Hold the top management of YEDC accountable for the utility's compliance with reporting requirements and implementation of directives of the Commission in line with the terms and conditions of the utility's licence.

- b. Drive increased operational performance from YEDC thereby improving energy delivery to customers under the YEDC franchise area.
- c. Drive YEDC towards achieving customer-centric operations and enhanced efficiency, which will consequentially boost the satisfaction of customers under the YEDC franchise area.
- d. Reinforce market discipline and ensure that YEDC's commercial performance sets it on the path of long-term financial sustainability.
- e. Hold the top management of YEDC accountable for meeting all targets specified herein.
- 11. The key performance indicators as measured by the indices defined in Table 2 shall be as follows:

Index	Definition		
Energy Off-take Relative to PCC	 Measures the proportion of energy YEDC delivered its customers relative to the total energy available ar nominated for distribution by YEDC. 		
Revenue Recovery Rate	Measures the ratio between the amount of revenue realised by YEDC for each unit of energy consumed relative to the amount it is allowed to recover per unit based on the extant tariff order.		
Compliance with Reporting of USoA	Measures the timeliness, accuracy and completeness of YEDC's USoA submissions to the Commission pursuant to extant rules/regulations.		
Compliance with API Feeder Streaming	Evaluates the ratio between the actual number of streams and the expected number of streams from YEDC's 11kV and 33kV feeders over a given period via the API system as prescribed by the Commission.		
Compliance with the Order on Capping of Estimated Bills	Measures YEDC's compliance with the periodic capping orders issued by the Commission both at an individual level (monthly energy billed to each customer) and a gross level (total energy billed to all unmetered customers via estimation).		
Compliance with the Implementation of Forum Decisions	Measures the rate and completeness with which YEDC implements the ruling of forum decisions.		
Resolution of Complaints received through the NERC Contact Centre and NERC HQ	Measures the rate with which YEDC resolves customer complaints within the customer service standards provided in the Customer Protection Regulation 2023 ("CPR").		

Table 2: Definition of Indices

1B

KEY PERFORMANCE INDICATORS

- 12. The Commission hereby orders as follows:
 - a. The performance of YEDC's management team shall be assessed with the following KPIs (full definition of each KPI is contained in Table 2):
 - i. Energy off-take relative to Partial Contracted Capacity ("PCC")
 - ii. Revenue recovery rate
 - iii. Compliance with reporting of Uniform System of Accounts ("USoA")
 - iv. Compliance with API feeder streaming
 - v. Compliance with the Order on capping of estimated bills
 - vi. Compliance with the implementation of forum decisions
 - vii. Compliance with service standards for the resolution of complaints received through the NERC contact centre and NERC HQ
 - b. The KPIs specified herein shall, with effect from 08 July 2024, be included in the basis for managerial performance measurement and may be amended or revoked by subsequent Orders issued by the Commission.
 - c. The Commission may issue updated targets, attainment trajectories and review periodicity for any of the KPIs, having regard to the evolution of the wider NESI and overarching policy environment.
 - d. The YEDC's management team shall be held accountable for achieving the KPIs specified in Table 3 and their performance shall be assessed periodically based on the review cycle for each KPI.
 - e. Where YEDC fails to achieve any target on a consecutive basis, the utility and its top management shall be liable for the consequential regulatory intervention specified in this Order.

i. Ei	nergy Offtake (Mc	nthly) Target
(October – Dece	Minimum Monthly Target effective 08 July 2024	
Energy Offtake (MWh/h)	% of Energy Offtake to PCC	% of Energy Off-take Relative to PCC
116.49	98.93%	100.00%
	(October – Dece nergy Offtake (MWh/h)	October – December 2023) nergy Offtake % of Energy (MWh/h) Offtake to PCC

CONSEQUENTIAL REGULATORY INTERVENTION

10. The management of YEDC shall be held accountable for achieving the KPIs specified in Table 3 above and the top management shall be liable to the consequential regulatory interventions listed in Table 4 for failure to achieve the specified targets.

11. Without prejudice to the provisions of the Electricity Industry (Enforcement) Regulations 2014, this Order specifies a clear/empirical basis for the achievement of each KPI and shall therefore be treated as strict liability infractions by the utility/management team which shall neither require the issuance of a Notice of Intention to Commence Enforcement ("NICE") action from the Commission nor
